

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Letters Patent of:
Ola SANDSTRÖM et al.

Patent No.: 7,127,682 B2

Issued: October 24, 2006

For: DEVICE AND SYSTEM FOR INFORMATION
MANAGEMENT

**REQUEST FOR CERTIFICATE OF CORRECTION
PURSUANT TO 37 CFR 1.322**

Attention: Certificate of Correction Branch
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Upon reviewing the above-identified patent, Patentee noted errors in printing the present patent, which should be corrected.

In the Claims:

In Claim 1 is the wrong claim altogether. Please replace claim 1 with the following:

--1. A drawing device comprising:

a sensor for sensing position information from a position-coding pattern on a plurality of tangible sheets associated with first and second filing appliances; and

a memory for storing the sensed positional information, the position information including information that is generated before and after time point t_{act} , wherein position information sensed before said time point t_{act} is to be inserted in a first information object

wherein the first information object is related to the first filing appliance, further wherein the first information object resides within a computer and is associated with a first application, and

wherein position information generated after said time point t_{act} is to be inserted in the second information object, wherein the second information object is related to a second filing appliance, further wherein the second information object resides within the computer system and is associated with at least one of the first application and a second application, and

further wherein the position information comprises activation information generated at the time point t_{act} , the activation information being indicative of an activation of the second filing appliance --

Claim 12, line 1, change "1" to --11--.

Claim 13, line 1, change "1 or 2" to --11 or 12--.

Claim 14, line 1, change "1" to --1--.

Claim 15, line 1, change "1" to --1--.

Claim 16, line 1, change "1" to --1--.

Claim 17, line 1, change "1" to --1--.

Claim 18, line 1, change "1" to --1--.

Claim 19, line 1, change "1" to --1--.

The attached certificate of correction corrects a clear PTO error in the printing of the patent in the above-identified application. The 312 Amendment filed by applicants on August 28, 2006 was entered by the Examiner in a letter dated September 8, 2006. The attached Statement of Claims illustrates that claim 1 of the issued patent should be application claim 25 as

correctly reflected in this 312 amendment. Instead, the patent was apparently printed with application claim 1 prior to the telephone interview conducted on May 18, 2006. This application claim is related to patent claim 11 and not patent claim 1.

Additionally, dependent claims 12-19 in whole or in part reflect the original application numbers and are corrected by this certificate to reflect the renumbered patent claims numbers assigned by the Examiner.

Since the patent was printed with claim errors and these errors appear to be wholly printing errors after substantive examination was completed, the patent office is requested to grant this certificate of correction.

Since the first independent claim of the application is wholly incorrect, applicant request that the patent be reprinted.

The errors were due to Patent Office mistake and are not caused by any action taken by applicant; accordingly no fee is required.

Transmitted herewith is a proposed Certificate of Correction effecting such amendment. Patentee respectfully solicits the granting of the requested Certificate of Correction.

Dated: August 13, 2007

Respectfully submitted,

By

Michael K. Mutter

PATENT NO : 7,127,682 B2
APPLICATION NO : 09/986,378
ISSUE DATE : October 24, 2006
INVENTOR(S) : Ola SANDSTRÖM et al

It is certified that errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

In the Claims:

**In Claim 1 is the wrong claim altogether. Please replace claim 1 with the following:
--25. A drawing device comprising:**

**a sensor for sensing position information from a position-coding pattern on a plurality of tangible sheets associated with first and second filing appliances; and
a memory for storing the sensed positional information, the position information including information that is generated before and after time point t_{act} , wherein position information sensed before said time point t_{act} is to be inserted in a first information object wherein the first information object is related to the first filing appliance, further wherein the first information object resides within a computer and is associated with a first application, and**

wherein position information generated after said time point t_{act} is to be inserted in the second information object, wherein the second information object is related to a second filing appliance, further wherein the second information object resides within the computer system and is associated with at least one of the first application and a second application, and

further wherein the position information comprises activation information generated at the time point t_{act} , the activation information being indicative of an activation of the second filing appliance.--

Claim 12, line 1, change "1" to --11--.

Claim 13, line 1, change "1 or 2" to --11 or 12--.

Claim 14, line 1, change "1" to --1--.

Claim 15, line 1, change "1" to --1--.

Claim 16, line 1, change "1" to --1--.

Claim 17, line 1, change "1" to --1--.

Claim 18, line 1, change "1" to --1--.

Claim 19, line 1, change "1" to --1--.
